Background:

In 2014, the Hualapai Tribal Council authorized the Tribe's Planning and Economic Development Department to apply to Western Area Power Association (Western) for a share of the Boulder Canyon Project's post-2017 Schedule D power pool for which the Tribe was allocated of 381 KW of contingent capacity and 831,142 KWhrs of firm energy per year as published in the Federal Register on December 18, 2014, and referred to as D1. In addition, the newly formed Hualapai Tribal Utility Authority (HTUA) applied to the Arizona Power Authority (APA) in May of 2015 for an additional 100 KW of Hoover Schedule D power and was allocated 100 KW of contingent capacity and 218,184 KWhrs of firm energy per year from the APA on July 17, 2015, and referred to as D1.

This electric power may be purchased from Western and the APA by the HTUA at a wholesale rate. However, the HTUA has yet to construct or purchase an electric distribution system to take delivery of this low cost power, so in the short-term the tribe has two viable options: 1) enter into a benefit arrangement with another Western customer in the BCP marketing area that can take delivery of the resource, or 2) enter in a power pool with other allottees where the power can be commingled to maximize the value of tribe's allocation. The tribe will also entertain offers that include the banking of energy, displacements, and the exchange of energy and capacity among customers.

On July 5, 2016, the HTUA received notice from the APA requesting 1) a resolution of Intent to Sign the Power Sales Contract, and 2) a resolution to Increase in Allocation Amount of up to Ten Percent for Boulder Canyon Project Post-2017 Schedule D Capacity & Energy. Both have been approved which may increase the D2 allocation 110 KW of contingent capacity and approximately 240,000 KWhrs of firm energy.

Hoover power has several costs to buy into the system which will have reduced value to the new allottee's allocation in the first several years of the 50-year contract. The estimated costs charged by Western to Hualapai for the D1 allocation are approximately \$27,500 in repayable advances, which can be spread over five years, plus an estimated \$2,700 in working capital and \$2,420 in transitional costs. For Hualapai's D2 allocation from the APA, these include approximately \$7,500 in repayable advances, which also can be spread over a five-year period, and a higher energy rate in 2018 to cover the estimated \$750 in working capital and \$675 in transitional costs requested by Western upfront.

I. SCOPE OF PROPOSAL

The HTUA will receive proposals for management for either or both its D1 and D2 allocations:

- a) Term of contract, amount of notice required prior to termination by either party, penalty for early withdrawal, if any, and structure of agreement including disposition of the allocation during the contract.
- b) Scheduling of power.
- c) Value per KW or KWhr of the D1 and/or D2 allocation to the tribe per year for the first five years of the contact (to address Western's buy-in costs) and a yearly projection thereafter.
- d) Address unforeseen increases in the annual BCP Revenue Requirement of the current 10-year forecasted annual BCP Revenue Requirement and what portion the tribe will pay, if any.
- e) Working capital re-payment by the tribe at end of contract, if any.
- f) Billing method with Western and/or APA and frequency of payments to the tribe.
- g) Management fees of D1 and/or D2 allocation in addition those listed above.
