COVID-19 Vaccines • Get The Facts

Submitted by: Sandra Irwin | Hualapai Health, Education & Training

COVID-19 Vaccines: Get the Facts

Looking to get the facts about the new COVID-19 vaccines? Here's what you need to know about the different vaccines and the benefits of getting vaccinated.

Vaccines to prevent the coronavirus disease 2019 (COVID-19) are perhaps the best hope for ending the pandemic. But as the U.S. Food and Drug Administration (FDA) begins authorizing emergency use of COVID-19 vaccines, you likely have questions. Find out about the benefits of the COVID-19 vaccines, how they work, the possible side effects and the importance of continuing to take infection prevention steps.

What are the benefits of getting a COVID-19 vaccine?

COVID-19 can cause severe medical complications and lead to death in some people. There is no way to know how COVID-19 will affect you. If you get COVID-19, you could spread the disease to family, friends and others around you.

Getting a COVID-19 vaccine can help protect you by creating an antibody response in your body without your having to become sick with COVID-19.

A COVID-19 vaccine might prevent you from getting COVID-19. Or, if you get COVID-19, the vaccine might keep you from becoming seriously ill or from developing serious complications.

Getting vaccinated also might help protect people around you from COVID-19, particularly people at increased risk of severe illness from COVID-19.

What COVID-19 vaccines have been approved and how do they work?

Currently, several COVID-19 vaccines are in clinical trials. The FDA will review the results of these trials before approving COVID-19 vaccines for use. But because there is an urgent need for COVID-19 vaccines and the FDA's vaccine approval process can take months to years, the FDA will first be giving emergency use authorization to COVID-19 vaccines based on less data than is normally required. The data must show that the vaccines are safe and effective before the FDA can give emergency use authorization.

Pfizer/BioNTech vaccine

The FDA has given emergency use authorization to the Pfizer/BioNTech COVID-19 vaccine. Data has shown that the vaccine starts working soon after the first dose and has an efficacy rate of 95% seven days after the second dose. This means that about 95% of people who get the vaccine are protected from becoming seriously ill with the virus. This vaccine is for people age 16 and older. It requires two injections given 21 days apart.

Moderna vaccine

The FDA has given emergency use authorization to the Moderna COVID-19 vaccine. Data has shown that the vaccine has an efficacy rate of 94.1%. This vaccine is for people age 18 and older. This vaccine requires two injections given 28 days apart.

Both the Pfizer/BioNTech and the Moderna COVID-19 vaccines use messenger RNA (mRNA). Coronaviruses have a spike-like structure on their surface called an S protein. COVID-19 mRNA vaccines give cells instructions for how to make a harmless piece of an S protein. After vaccination, cells begin making the protein pieces and displaying them on cell surfaces. Your immune system will recognize that the protein doesn't belong there and begin building an immune response and making antibodies.

Issue #26 | Thursday, December 24, 2020

GAWAJU
Newsletter of the Hualapai Tribe

Can a COVID-19 vaccine give you COVID-19?

No. The COVID-19 vaccines currently being developed in the U.S. don't use the live virus that causes COVID-19.

Keep in mind that it will take a few weeks for your body to build immunity after getting a COVID-19 vaccination. As a result, it's possible that you could become infected with the virus that causes COVID-19 just before or after being vaccinated.

What are the possible side effects of a COVID-19 vaccine?

A COVID-19 vaccine can cause mild side effects after the first or second dose, including:

- Pain, redness or swelling where the shot was given
- Fever
- Fatigue
- Headache
- Muscle pain
- Chills
- Joint pain

You'll likely be monitored for 15 minutes after getting a COVID-19 vaccine to see if you have an immediate reaction. Most reactions happen with the first few days after vaccination and last no more than three days. If you experience side effects after getting a COVID-19 vaccine, it doesn't mean that you have COVID-19. Take time to rest and recover. If you develop a fever, stay home. However, it's not necessary to get a COVID-19 test or quarantine.

If you have a reaction that prevents you from being able to eat, sleep or work, contact your doctor. Also, contact your doctor if you have a reaction that lasts longer than three days.

Signs of an allergic reaction include hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, and weakness. If you have any of these signs, seek care immediately.

How are the COVID-19 vaccines being distributed?

Due to limited supplies, not everyone will be able to get a COVID-19 vaccine right away.

The Advisory Committee on Immunization Practices (ACIP) is a U.S. federal advisory group made up of medical and public health experts. The ACIP has recommended that in the first phase of vaccination in the U.S., COVID-19 vaccines should be given to health care personnel and adult residents of long-term care facilities.

The ACIP has also recommended that the next group to get a vaccine in the U.S. should include people age 75 and older and frontline essential workers, such as first responders, teachers and public transit and grocery store workers. The third priority group recommended to get the vaccine in the U.S. includes people ages 65 to 74, people ages 16 to 64 who are at high risk of severe COVID-19 due to underlying medical conditions and all other essential workers, such as those working in food service and construction. Examples of underlying medical conditions include type 2 diabetes and severe obesity.

Related information

COVID-19: Who's at higher risk of serious symptoms?

Can I get a COVID-19 vaccine if I have a history of severe allergic reactions?

If you have a history of severe allergic reactions not related to vaccines or injectable medications, you may still get a COVID-19 vaccine. You should be monitored for 30 minutes after getting the vaccine.

If you've had a severe allergic reaction to other vaccines or injectable medications, ask your doctor if you should get a COVID-19 vaccine. If you've ever had a severe allergic reaction to any ingredient in a COVID-19 vaccine, the Centers for Disease Control and Prevention recommends not getting that specific vaccine.

If you have a severe allergic reaction after getting the first dose of a COVID-19 vaccine, don't get the second dose.

Can pregnant or breastfeeding women get the COVID-19 vaccine?

There is no research on the safety of COVID-19 vaccines in pregnant or breastfeeding women. However, if you are pregnant or breastfeeding and part of a group recommended to get a COVID-19 vaccine, you may choose to get the vaccine. Talk to your health care provider about the risks and benefits.

Is there anyone who should not get a COVID-19 vaccine?

There is no COVID-19 vaccine yet for children under age 16. Several companies have begun enrolling children as

young as age 12 in COVID-19 vaccine clinical trials. Studies including younger children will begin soon. COVID-19 vaccination might not be recommended for people with certain health conditions. Talk to your doctor if you have questions about getting the vaccine.

Should I get the COVID-19 vaccine even if I've already had COVID-19?

Getting COVID-19 might offer some natural protection or immunity from reinfection with the virus that causes COVID-19. But it's not clear how long this protection lasts. Because reinfection is possible and COVID-19 can cause severe medical complications, it might be recommended that people who have already had COVID-19 get a COVID-19 vaccine. If you've had COVID-19, wait until 90 days after your diagnosis to get a COVID-19 vaccine.

Can I stop taking safety precautions after getting a COVID-19 vaccine?

Experts want to learn more about the protection that a COVID-19 vaccine provides and how long immunity lasts before changing safety recommendations. Factors such as how many people get vaccinated and how the virus is spreading in communities will also affect these recommendations.

In the meantime, the Centers for Disease Control and Prevention recommends following these precautions for avoiding infection with the COVID-19 virus:

- **Avoid close contact.** This means avoiding close contact (within about 6 feet, or 2 meters) with anyone who is sick or has symptoms. Also, keep distance between yourself and others. This is especially important if you have a higher risk of serious illness.
- **Wear cloth face coverings in public places.** Cloth face coverings offer extra protection in places such as the grocery store, where it's difficult to avoid close contact with others. Surgical masks may be used if available. N95 respirators should be reserved for health care providers.
- **Practice good hygiene.** Wash your hands often with soap and water for at least 20 seconds, or use an alcohol-based hand sanitizer that contains at least 60% alcohol. Cover your mouth and nose with your elbow or a tissue when you cough or sneeze. Throw away the used tissue. Avoid touching your eyes, nose and mouth. Avoid sharing dishes, glasses, bedding and other household items if you're sick. Clean and disinfect high-touch surfaces daily.
- **Stay home if you're sick.** Stay home from work, school and public areas if you're sick, unless you're going to get medical care. Avoid public transportation, taxis and ride-sharing if you're sick.

If you have a chronic medical condition and may have a higher risk of serious illness, check with your doctor about other ways to protect yourself.

DIAMOND CREEK ROAD IS NOW OPEN FOR COMMUNITY USE AS OF 12.22.2020

Road repairs are completed and the
North Diamond Creek Checkpoint is open
for use.

Community**

#StopTheSpread

The Covid-19 Vaccination is an important tool to help stop the pandemic

01 The safety of the vaccines is top priority

The U.S. vaccine safety system ensures that vaccines are as safe as possible. The two FDA approved Covid vaccines have been tested on over 74,000 people. The vaccines are found to be safe and 94-95 % effective

02 Facts about the vaccine.

- The vaccine will not give you Covid-19, there is no live virus used in vaccine
- The vaccine will not cause you to test positive on a covid -19 viral lab test
- Getting vaccinated can help prevent getting sick with Covid-19
- People who have gotten Covid-19 may still benefit from getting the vaccine
- The vaccine will not alter your DNA

03 Side effects that have been reported include but are not limited to: pain at injection site, redness or swelling at injection site, tiredness, headache, muscle pain, chills, joint pain, fever, nausea, swollen lymph nodes, allergic reaction

04 How long until I'm protected?

- Two doses are required and will be scheduled 3-4 weeks apart.
- You may not be fully protected until 1-2 weeks after your second dose of vaccine

FACT SHEET FOR RECIPIENTS AND CAREGIVERS**EMERGENCY USE AUTHORIZATION (EUA) OF
THE PFIZER-BIONTECH COVID-19 VACCINE TO PREVENT CORONAVIRUS DISEASE 2019 (COVID-19)
IN INDIVIDUALS 16 YEARS OF AGE AND OLDER**

You are being offered the Pfizer-BioNTech COVID-19 Vaccine to prevent Coronavirus Disease 2019 (COVID-19) caused by SARS-CoV-2. This Fact Sheet contains information to help you understand the risks and benefits of the Pfizer-BioNTech COVID-19 Vaccine, which you may receive because there is currently a pandemic of COVID-19.

The Pfizer-BioNTech COVID-19 Vaccine is a vaccine and may prevent you from getting COVID-19. There is no U.S. Food and Drug Administration (FDA) approved vaccine to prevent COVID-19.

Read this Fact Sheet for information about the Pfizer-BioNTech COVID-19 Vaccine. Talk to the vaccination provider if you have questions. It is your choice to receive the Pfizer-BioNTech COVID-19 Vaccine.

The Pfizer-BioNTech COVID-19 Vaccine is administered as a 2-dose series, 3 weeks apart, into the muscle.

The Pfizer-BioNTech COVID-19 Vaccine may not protect everyone.

This Fact Sheet may have been updated. For the most recent Fact Sheet, please see www.cvdvaccine.com.

WHAT YOU NEED TO KNOW BEFORE YOU GET THIS VACCINE?**WHAT IS COVID-19?**

COVID-19 disease is caused by a coronavirus called SARS-CoV-2. This type of coronavirus has not been seen before. You can get COVID-19 through contact with another person who has the virus. It is predominantly a respiratory illness that can affect other organs. People with COVID-19 have had a wide range of symptoms reported, ranging from mild symptoms to severe illness. Symptoms may appear 2 to 14 days after exposure to the virus. Symptoms may include: fever or chills; cough; shortness of breath; fatigue; muscle or body aches; headache; new loss of taste or smell; sore throat; congestion or runny nose; nausea or vomiting; diarrhea.

WHAT IS THE PFIZER-BIONTECH COVID-19 VACCINE?

The Pfizer-BioNTech COVID-19 Vaccine is an unapproved vaccine that may prevent COVID-19. There is no FDA-approved vaccine to prevent COVID-19. 2

Revised: December 2020 The FDA has authorized the emergency use of the Pfizer-BioNTech COVID-19 Vaccine to prevent COVID-19 in individuals 16 years of age and older under an Emergency Use Authorization (EUA).

For more information on EUA, see the “**What is an Emergency Use Authorization (EUA)?**” section at the end of this Fact Sheet.

WHAT SHOULD YOU MENTION TO YOUR VACCINATION PROVIDER BEFORE YOU GET THE PFIZER-BIONTECH COVID-19 VACCINE?

Tell the vaccination provider about all of your medical conditions, including if you:

- have any allergies
- have a fever
- have a bleeding disorder or are on a blood thinner
- are immunocompromised or are on a medicine that affects your immune system
- are pregnant or plan to become pregnant
- are breastfeeding
- have received another COVID-19 vaccine

WHO SHOULD GET THE PFIZER-BIONTECH COVID-19 VACCINE?

FDA has authorized the emergency use of the Pfizer-BioNTech COVID-19 Vaccine in individuals 16 years of age and older.

WHO SHOULD NOT GET THE PFIZER-BIONTECH COVID-19 VACCINE?

You should not get the Pfizer-BioNTech COVID-19 Vaccine if you:

- had a severe allergic reaction after a previous dose of this vaccine

- had a severe allergic reaction to any ingredient of this vaccine.

WHAT ARE THE INGREDIENTS IN THE PFIZER-BIONTECH COVID-19 VACCINE?

The Pfizer-BioNTech COVID-19 Vaccine includes the following ingredients: mRNA, lipids ((4-hydroxybutyl) azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N,N-ditetradecylacetamide, 1,2-Distearoyl-sn-glycero-3- phosphocholine, and cholesterol), potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose.

HOW IS THE PFIZER-BIONTECH COVID-19 VACCINE GIVEN?

The Pfizer-BioNTech COVID-19 Vaccine will be given to you as an injection into the muscle.

The Pfizer-BioNTech COVID-19 Vaccine vaccination series is 2 doses given 3 weeks apart.

If you receive one dose of the Pfizer-BioNTech COVID-19 Vaccine, you should receive a second dose of this same vaccine 3 weeks later to complete the vaccination series. 3 Revised: December 2020

HAS THE PFIZER-BIONTECH COVID-19 VACCINE BEEN USED BEFORE?

The Pfizer-BioNTech COVID-19 Vaccine is an unapproved vaccine. In clinical trials, approximately 20,000 individuals 16 years of age and older have received at least 1 dose of the Pfizer-BioNTech COVID-19 Vaccine.

WHAT ARE THE BENEFITS OF THE PFIZER-BIONTECH COVID-19 VACCINE?

In an ongoing clinical trial, the Pfizer-BioNTech COVID-19 Vaccine has been shown to prevent COVID-19 following 2 doses given 3 weeks apart. The duration of protection against COVID-19 is currently unknown.

WHAT ARE THE RISKS OF THE PFIZER-BIONTECH COVID-19 VACCINE?

Side effects that have been reported with the Pfizer-BioNTech COVID-19 Vaccine include:

- injection site pain
- tiredness
- headache
- muscle pain
- chills
- joint pain
- fever
- injection site swelling
- injection site redness
- Nausea
- feeling unwell
- swollen lymph nodes (lymphadenopathy)

There is a remote chance that the Pfizer-BioNTech COVID-19 Vaccine could cause a severe allergic reaction. A severe allergic reaction would usually occur within a few minutes to one hour after getting a dose of the Pfizer-BioNTech COVID-19 Vaccine. Signs of a severe allergic reaction can include:

- Difficulty breathing
- Swelling of your face and throat
- A fast heartbeat
- A bad rash all over your body
- Dizziness and weakness

These may not be all the possible side effects of the Pfizer-BioNTech COVID-19 Vaccine. Serious and unexpected side effects may occur. Pfizer-BioNTech COVID-19 Vaccine is still being studied in clinical trials.

WHAT SHOULD I DO ABOUT SIDE EFFECTS?

If you experience a severe allergic reaction, call 9-1-1, or go to the nearest hospital.

Call the vaccination provider or your healthcare provider if you have any side effects that bother you or do not go away. 4 Revised: December 2020

Report vaccine side effects to **FDA/CDC Vaccine Adverse Event Reporting System (VAERS)**. The VAERS toll-free number is 1-800-822-7967 or report online to <https://vaers.hhs.gov/reportevent.html>. Please include "Pfizer-BioNTech COVID-19 Vaccine EUA" in the first line of box #18 of the report form.

In addition, you can report side effects to Pfizer Inc. at the contact information provided below.

| Website | Fax number | Telephone number |
|--|-------------------|-------------------------|
| www.pfizersafetyreporting.com | 1-866-635-8337 | 1-800-438-1985 |

WHAT IF I DECIDE NOT TO GET THE PFIZER-BIONTECH COVID-19 VACCINE?

It is your choice to receive or not receive the Pfizer-BioNTech COVID-19 Vaccine. Should you decide not to receive it, it will not change your standard medical care.

ARE OTHER CHOICES AVAILABLE FOR PREVENTING COVID-19 BESIDES PFIZER-BIONTECH COVID-19 VACCINE?

Currently, there is no approved alternative vaccine available for prevention of COVID-19. FDA may allow the emergency use of other vaccines to prevent COVID-19.

CAN I RECEIVE THE PFIZER-BIONTECH COVID-19 VACCINE WITH OTHER VACCINES?

There is no information on the use of the Pfizer-BioNTech COVID-19 Vaccine with other vaccines.

WHAT IF I AM PREGNANT OR BREASTFEEDING?

If you are pregnant or breastfeeding, discuss your options with your healthcare provider.

WILL THE PFIZER-BIONTECH COVID-19 VACCINE GIVE ME COVID-19?

No. The Pfizer-BioNTech COVID-19 Vaccine does not contain SARS-CoV-2 and cannot give you COVID-19.

KEEP YOUR VACCINATION CARD

When you get your first dose, you will get a vaccination card to show you when to return for your second dose of Pfizer-BioNTech COVID-19 Vaccine. Remember to bring your card when you return. 5 Revised: December 2020

ADDITIONAL INFORMATION

If you have questions, visit the website or call the telephone number provided below.

To access the most recent Fact Sheets, please scan the QR code provided below.

Global website

www.cvdvaccine.com

Telephone number

1-877-829-2619 (1-877-VAX-CO19)

HOW CAN I LEARN MORE?

- Ask the vaccination provider.
- Visit CDC at <https://www.cdc.gov/coronavirus/2019-ncov/index.html>.
- Visit FDA at <https://www.fda.gov/emergency-preparedness-and-response/mcmlegal-regulatory-and-policy-framework/emergency-use-authorization>.
- Contact your local or state public health department.

WHERE WILL MY VACCINATION INFORMATION BE RECORDED?

The vaccination provider may include your vaccination information in your state/local jurisdiction's Immunization Information System (IIS) or other designated system. This will ensure that you receive the same vaccine when you return for the second dose. For more information about IISs visit: <https://www.cdc.gov/vaccines/programs/iis/about.html>.

WHAT IS THE COUNTERMEASURES INJURY COMPENSATION PROGRAM?

The Countermeasures Injury Compensation Program (CICP) is a federal program that may help pay for costs of medical care and other specific expenses of certain people who have been seriously injured by certain medicines or vaccines, including this vaccine. Generally, a claim must be submitted to the CICP within one (1) year from the date of receiving the vaccine. To learn more about this program, visit www.hrsa.gov/cicp/ or call 1-855-266-2427.

WHAT IS AN EMERGENCY USE AUTHORIZATION (EUA)?

The United States FDA has made the Pfizer-BioNTech COVID-19 Vaccine available under an emergency access mechanism called an EUA. The EUA is supported by a Secretary of Health and Human Services (HHS) declaration that circumstances exist to justify the emergency use of drugs and biological products during the COVID-19 pandemic.

The Pfizer-BioNTech COVID-19 Vaccine has not undergone the same type of review as an FDA-approved or cleared product. FDA may issue an EUA when certain criteria are met, which includes that there are no adequate, approved, available alternatives. In addition, the FDA decision is based on the totality of scientific evi-

dence available showing that the product may be effective to prevent COVID-19 during the COVID-19 pandemic and that the known and potential benefits of the product outweigh the known 6 Revised: December 2020 and potential risks of the product. All of these criteria must be met to allow for the product to be used in the treatment of patients during the COVID-19 pandemic.

The EUA for the Pfizer-BioNTech COVID-19 Vaccine is in effect for the duration of the COVID-19 EUA declaration justifying emergency use of these products, unless terminated or revoked (after which the products may no longer be used).

RECEPTION

cdc.gov/coronavirus

Getting 'Back to Normal' Is Going to Take **All of Our Tools**

If we use all the tools we have, we stand the best chance of getting our families, communities, schools, and workplaces "back to normal" sooner:

Get vaccinated.

Wear a mask.

Stay 6 feet from others,
and avoid crowds.

Wash
hands often.

www.cdc.gov/coronavirus/vaccines

Mohave County Department of Public Health

Good afternoon Mohave County. We'd like to share information about the Vaccine Distribution Phases. **DISCLAIMER:** This information changes rapidly and we will do our best to give you the latest information available. Information is subject to change.

PUBLIC HEALTH BULLETIN

COVID-19 VACCINE*

Updated December 21, 2020

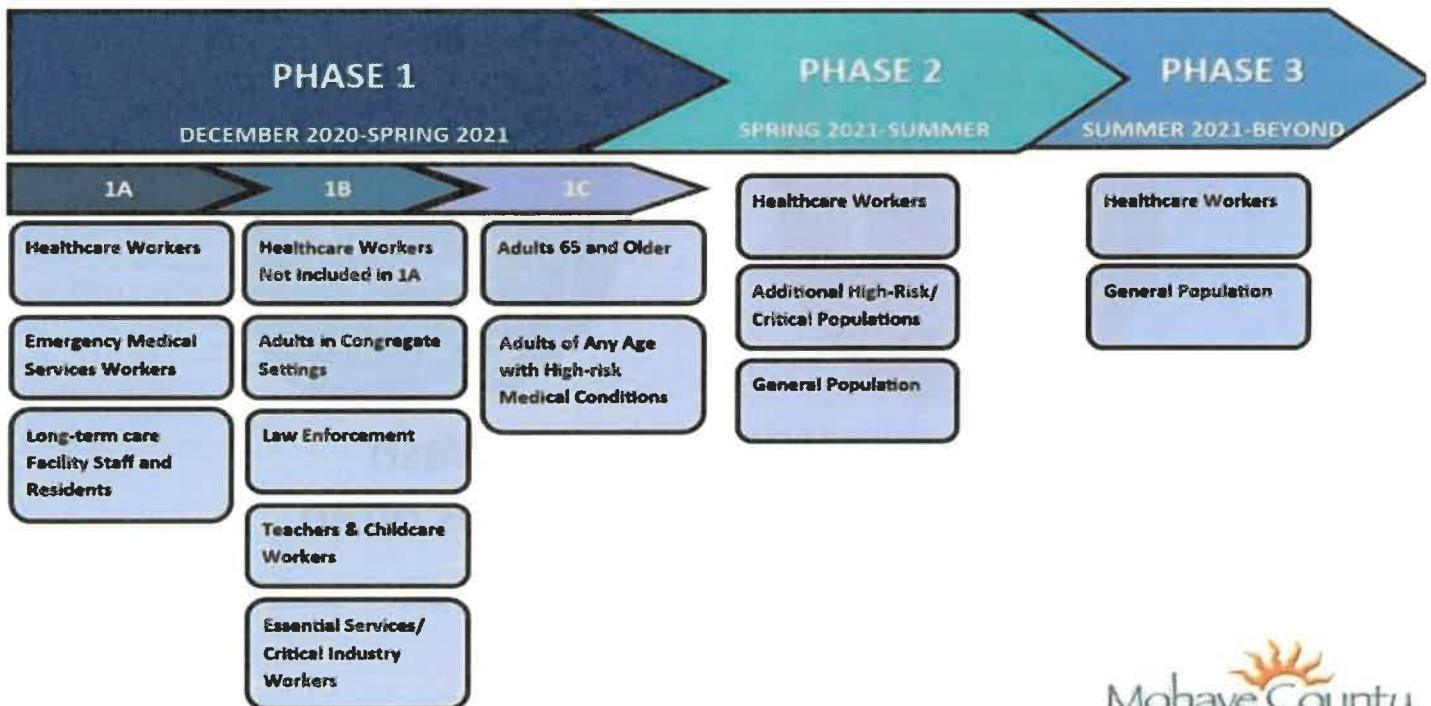

In coordination with the Arizona Department of Health Services COVID-19 Vaccination Plan, our planning efforts include involvement from hospital and healthcare systems, emergency response agencies, federally qualified health clinics, pharmacies, community-based organizations, and others. The role of different partners in vaccine distribution will depend on vaccine supply and the stage of the vaccine distribution plan. Updates will be provided as more information becomes available about COVID-19 vaccine.

A Phased Approach

CDC guidance in the COVID-19 Vaccine Interim Playbook describes a phased approach to distribution. Because there is likely to be a limited supply when vaccine first becomes available, CDC will direct what groups are prioritized based on their risk levels. The first phase (1A) of vaccine distribution will include healthcare workers and long-term care facility residents and staff.

The second phase (1B) will include healthcare workers not included in 1A, adults in congregate settings, law enforcement, teachers and childcare workers, and essential services/critical industry workers.

The third phase (1C) includes any adults aged 65 and older, and adults of any age with high-risk medical conditions.

*DISCLAIMER: Distribution groups and timelines of phases shown are tentative. This information is subject to change due to future vaccine distribution guidance recommendations, FDA approval of vaccines, and vaccine allocation/availability. We will update the information as it becomes available.

Hualapai Nation Emergency Services • Community Wide Internet Deployment*Submitted by: Mark Lowry | Hualapai Nation Emergency Services***Hualapai Nation Emergency Services**

P.O. Box 179

Peach Springs, Arizona 86434

Office: (928) 769-2656**Emergency Line: (928) 769-2205****Fax: (928) 769-2883**December 22nd, 2020

TO: General Public

FROM: Mark Lowry, Fire Chief

RE: Community wide internet deployment

I wanted to let the community know that the Tribal wide internet system will start deploying to the public starting December 28th, 2020. This rollout of internet services will occur over the course of three weeks. The final preparations are currently underway, to include local testing, final site alignment and installation, and deployment review and adjustment.

During this phase of deployment, services will be provided to all government and residential buildings that are located in Peach Springs area, Buck and Doe area, and the Valentine area. There is nothing required of the end user at the moment. 1 piece of equipment will be provided to each household, with instructions to connect. Following this, each household will receive up to 5 megabit service respectively. The device provided to the public will allow wired and wireless connections within the household.

This service is provided to the public at no cost to the user. The only thing the household needs to provide is the electrical plug in to power the receiving device. This service is designed and deployed in an effort to bring increased and enhanced access to child education via remote learning and other educational aspects, telehealth options for medical assistance, as well as teleworking needs that have resulted from COVID-19.

This system is deployed and managed by the Hualapai Tribe. This means that basic technical assistance will be available locally. More complex needs will be addressed and resolved by an entity that is contracted with the Tribe to perform these types of services.

As deployment occurs, all users will receive more information, to include technical assistance that may be required, contact numbers, hours of operation, and basic troubleshooting that the end user can perform if necessary.

Thank you and Happy Holidays,

Mark Lowry, MPA, MS, NRP.

THEREFORE IT BE RESOLVED,

The Hualapai Tribal Council gives the authority to determine the following, of escalating and deescalating COVID-19 Response based on a Color Coding Alert System to the Incident Commander of the ICT to negate the impacts of COVID-19 to preserve public health to the greatest extent possible and to slow the spread of COVID-19.

The Color Coding Alert System to escalation and de-escalation shall be determined based on following specific to the Hualapai Reservation, and shall be applicable three (3) days after determination of the escalating or deescalating COVID-19 Response.

Color Coding Alert System does not cease or replace prior resolutions In regards to COVID-19 Response and Protection of the Hualapai Reservation, the color coding alert system identifies the escalating and deescalating of the COVID-19 Response.

Escalation and de-escalation determination shall be as follows:

Color Coding COVID19 Alert System:

Red Alert: COVID Pandemic still active, COVID 19 Community Spread is evident through contact tracing. 14 Day Lockdown of the Hualapai Reservation implemented regarding Resolution 38 to slow the spread of the virus. Households placed on Isolation-Quarantine status until determined recovered from the virus, Curfew from the hours of 8pm to 5am daily to slow the spread of the COVID-19 virus.

If statistical data indicates continued growth of Community Spread, lockdown shall be extended to, and shall not exceed 21 days total.

Lockdown shall temporarily prohibit all activities, to include non-essential tribal employees working. Essential and non-essential employment shall be at the discretion of the tribal council or department head.

Orange Alert: COVID-19 Pandemic still active, COVID-19 case(s) on the Hualapai Reservation with no community spread according to Contact Tracing. Households placed on Isolation-quarantine status until determined recovered. Stay at Home Order as per resolution 36-2020 remain in effect for a period of time while COVID-19 virus is active on the Hualapai Reservation until determined no COVID-19 Cases are actively being monitored. Curfew from the hours of 8pm to 5am daily to slow the spread of the COVID-19 virus.

Stay at Home Order in effect, limited access shall be allowed on the reservation to only essential functions including work, financial obligations, school, legal and legislative matters, and a curfew order shall be in effect from the hours of 8PM to 5AM daily.

While the Stay at Home Order is in effect, persons entering and exiting the reservation are subject to visual inspection at inspection points located throughout the reservation when entering or leaving and shall limit their travel through the inspection station to 2 trips per day for essential matters only. Persons are limited to only persons from the same household within a vehicle while traveling.

Blue Alert: COVID-19 Pandemic still active. No active COVID 19 cases on the Hualapai Reservation. No Community Spread. Curfew from the hours of 8pm to 5am daily to slow the spread of the COVID-19 Virus. Limiting travel off the reservation is discouraged to help control the virus and limit travel for essential needs. All CDC guidelines followed for precautions to avoid the virus. I.e. properly wearing a Face masks, properly washing hands, sanitizing and social distancing.

Green Alert: COVID 19 Pandemic Ceased, lowest risk, Vaccine available.

THEREFORE IT BE FURTHER RESOLVED,

Fines and penalties shall apply for persons that violate following:

Stay at Home Order

Lockdown

Isolation/Quarantine

CERTIFICATION

I, the undersigned as Chairman of the Hualapai Tribal Council hereby **certify** that the Hualapai Tribal council of the Hualapai Tribe is composed of 9 members of whom eight (8) constituting a quorum were present at a Regular Council Meeting held on this 4th day of September, 2020, and that the foregoing resolution was duly adopted by a vote of 8 approve, 0 not voting, 1 excused; pursuant to authority of Article V, Section A, of the Constitution of the Hualapai Tribe approved March 13, 1991.

ATTEST:

GENERAL INFORMATION & EVENTS

Biden Picks Deb Haaland to be First Native American Secretary of Interior

Submitted by: Kevin Davidson | Hualapai Planning Department

Biden Picks Deb Haaland to Be First Native American Secretary of Interior

By: [Jennifer A Dlouhy](#) and [Jennifer Epstein](#), Bloomberg News

December 17, 2020, 12:35 PM MST Updated on December 17, 2020, 1:47 PM MST

President-elect Joe Biden has tapped Deb Haaland to lead the Interior

Department, according to people familiar with the matter, putting the Democratic representative in line to become the first American Indian cabinet secretary in U.S. history.

If confirmed as Interior secretary, Haaland would have a chance to chart the future of conservation, recreation and oil drilling on federal land, including territory in New Mexico, the state she represents in the House of Representatives.

Haaland, a 60-year-old citizen of the Laguna Pueblo, a 7,700-member tribe west of Albuquerque, New Mexico, has drawn widespread

praise from environmental groups and tribal leaders. They say she would bring a deep commitment to protect the land to an agency in charge of 500 million acres of it.

“Joe Biden chose the most qualified person and put a true movement progressive in his cabinet,” said Stephanie Taylor, co-founder of the Progressive Change Campaign Committee, which had championed the choice.

However, Haaland could face pushback from Republicans in the Senate, wary of her opposition to fracking, the technique that has driven U.S. oil and gas development to record levels, and her support of the Green New Deal, a progressive plan to rapidly decarbonize the U.S. economy.

Haaland has said she’s “wholeheartedly against fracking and drilling on public lands.”

If confirmed, Haaland would be the third House Democrat to leave for the Biden administration -- which would leave the chamber’s Democratic leaders with a narrow majority before special elections to fill the open seats.

Jane Kleeb, a pipeline activist and the chairwoman of the Nebraska Democratic Party who encouraged Haaland’s selection said she was struck by the lawmaker’s focus on protecting the land during a meeting of Democratic operatives last year. Haaland’s first words at the microphone were that “the land is everything.”

“Her focus always would be protecting the land,” Kleeb said in an interview before Biden made his selection. Haaland “will take that department in a completely new direction.”

The Interior Department runs the national park system and oversees grazing, recreation, energy development and other activities on about a fifth of U.S. land. The department holds trust title to more than 56 million acres for tribal nations and its Bureau of Indian Affairs works directly with 578 federally recognized Native American tribes.

If confirmed, Haaland would be charged with charting a new course for the department, including implementing Biden’s campaign promises to limit fracking and stop permitting fossil projects on federal land.

That would be a dramatic shift from the Trump administration. Over the past four years, the Interior Department has relentlessly driven mining and drilling on federal real estate, while creating new hunting and fishing opportunities at wildlife refuges and hatcheries.

In the House, Haaland has advocated greater consultation with tribes, conservation of federal lands and federal-tribal collaboration to prevent violent crimes. She worked to block drilling near the sandstone mesas and ruins of northwest New Mexico's Greater Chaco region.

Haaland grew up in a military family, with her father a combat Marine and her mother in the Navy. She attended 13 different schools before graduating in Albuquerque, and she obtained her undergraduate and law degrees from the University of New Mexico. Haaland has talked about her struggles as a single mother, volunteering at her daughter's pre-school and at times relying on food assistance.

She has long been active in Democratic politics, volunteering for John Kerry's presidential bid in 2004, working on Barack Obama's presidential campaigns in 2008 and 2012, and later serving as chairwoman of the New Mexico Democratic Party.

She also served as tribal administrator of the San Felipe Pueblo, ran a small business producing Pueblo Salsa and oversaw business operations of the second-largest tribal gaming enterprise in New Mexico as chairwoman of the Laguna Development Corporation Board of Directors.

Fiber is in the Air

Submitted by: Rojeana Wymbs | Mohave Electric Cooperative

Fiber is in the air!

MEC, and contract crews, have been steadily working to stay on track with the Fiber/Broadband construction plans.

BULLHEAD CITY, Ariz. – Construction of the fiber network backbone began on December 1st, 2020 and to date crews have hung over four thousand feet of fiber-optic line. Crews continue to complete make-ready work to ensure the project continues at a steady pace. "We have completed the planning and numerous steps to get us to this point with the fiber infrastructure now being installed. This is what our members have been waiting for, and we are pleased to reach this milestone with the first phase of member connections to follow the buildout of the backbone," said Tyler Carlson, CEO of MEC.

Every day we are steps closer to providing members with symmetrical and reliable internet. MEC's fiber buildout will supply TWN Communications the ability to provide reliable internet that our members might not have seen before from other providers in MEC's service territory. We want all of our members to know that the fiber is on its way. Construction of such a large communication project is time consuming but please know we are working hard every day to supply these enhancements to every member before 2026. This project has a five year buildout that benefits many aspects of our electrical system while supplying reliable internet service that all of our members will benefit from.

Benefits to our electrical system will include real time meter reads, faster outage notifications, and many more advancements that will ease the lives of our members.

For the most up-to-date notifications sent directly to your email, pre-register at <https://www.mohaveelectric.com/broadband/>. If you have any further questions or desire more personable information, visit with our Fiber/Broadband Member Liaison, Rojeana Wymbs by either calling 928-763-1100, option 0. Or visit with her at our Member Services Office located at 928 Hancock Rd in Bullhead City.

First Things First • Helping Your Young Child Stay Connected During the Holiday Season

Submitted by: Kim Corbin | *First Things First*

 FIRST THINGS FIRST

HUALAPAI TRIBE
REGIONAL PARTNERSHIP COUNCIL

HELPING YOUR YOUNG CHILD STAY CONNECTED DURING THE HOLIDAY SEASON

This year for the holidays, many families will be connecting virtually. Young kids learn and develop by interacting with caring adults, and whatever app you choose — FaceTime, Facebook Messenger, Zoom, Skype, Google, etc. — video chat is a great way to help your little one build a relationship and stay connected with long-distance family and friends. That's true anytime, but especially during the holidays and the ongoing COVID-19 pandemic.

Here are the top five tips from First Things First, Arizona's early childhood agency:

1. Get up close and personal.

Eye contact is the key, so sit close to the screen and make sure there's enough light that your little chat partner can see your whole face.

2. Get your timing right.

Schedule the video chat for when your baby or toddler is more likely to be alert and ready to pay attention, like in the morning. And expect the chat to be relatively short in length — about five minutes or less, depending on the age of the child.

3. Make It an interactive experience.

There are a lot of fun ways to engage and play together virtually. You can read them a book, sing songs and rhymes, play with stuffed animals, puppets or toys. No matter

how you engage them, the key is to make it a back-and-forth interaction.

4. Ask them open-ended questions, and be a good listener.

Young kids learn language and develop early literacy skills by having back-and-forth conversations, even before they can use words themselves. Ask questions that take more than a yes-or-no answer. Then lean in and give them a chance to respond. As a leading early language expert recommends, "Talk to them as if they're the most interesting person in the world."

5. Show them the love.

Video chat with young children is about making an emotional connection. And you — the parent sitting together with your child during the video chat — can play an important role. When your child's on-screen partner gives them a virtual kiss or tickle, you can actually give your child a kiss on the cheek or tickle as a way to nurture their relationship. As our partners at ZERO TO THREE put it, "Be the 'hands and heart' of the person on-screen."

The American Academy of Pediatrics recommends that parents limit screen time for young children, and that children younger than 18 months should avoid the use of screen media. But video chat is an exception, even for babies.

Coronavirus (COVID-19) and Stigma

Submitted by: Martina Dawley | Hualapai Cultural Resources Department

Coronavirus (COVID-19) and Stigma

Viruses Don't Discriminate, and Neither Should We

Stigma is a strong feeling of disapproval that is often based on unfair judgment or misinformation about a group of people or certain actions or activities. The stress, fear, and anxiety about a disease, like COVID-19, can lead to stigma toward people or places. Stigma hurts everyone by creating fear and anger. Stigmatized people are hurt emotionally and mentally, and may be rejected by others, denied healthcare, education, housing or employment, or even face physical violence. We can all do our part to reduce stigma.

Coronavirus doesn't recognize race, nationality, or ethnicity.

Diseases can make anyone sick regardless of their race or ethnicity. COVID-19 started in China, but that's just geography. Having Chinese ancestry (or any other ancestry) does not make a person more likely to get COVID-19. Likewise, being from a place where people have COVID-19 doesn't mean the person has the disease.

Wearing a mask does not mean a person is ill.

We should not judge someone for wearing a mask/bandana or assume they are sick. People wear masks for a variety of reasons, including to avoid pollen and air pollution, for cultural and social reasons, or they may be wearing the mask because they (or someone they care for) are at higher risk for getting sick, and they are trying to protect themselves. They may be a health care worker doing their best to keep everyone safe.

You can interrupt stigma. Start by sharing information that is true.

Know the facts and avoid spreading misinformation. Stay informed through trusted sources like the Centers for Disease Control and Prevention (CDC.gov), Indian Health Service (IHS.gov), Johns Hopkins University (JHU.edu), etc.

Speak up if you hear, see, or read false information or mistreatment of others.

Gently correct false information, and remind the speaker that speaking badly of others and treating them unkindly makes us all less safe. If serious mistreatment occurs, report it to authorities or call 911.

Show compassion and support for those most closely impacted.

Listen to, acknowledge and, with their consent, share the stories of people experiencing stigma, along with a message that treating people this way is not acceptable in your community. Create learning opportunities for youth and others to identify and correct racist and misinformed ideas.

We're all in this together.

Everyone can do their part to help slow the spread of coronavirus. There are things you can do to help keep yourself and others healthy. Stay home, wash hands often with soap and water for at least 20 seconds, avoid touching eyes, nose and mouth, and clean and sanitize commonly-touched items in the home frequently. When sick, stay away from others and cover coughs and sneezes with a tissue, then throw the tissue in the trash and wash hands.

Social Stigma associated with COVID-19

A guide to preventing and addressing social stigma¹

Target audience: Government, media and local organizations working on the new coronavirus disease (COVID-19).

WHAT IS SOCIAL STIGMA?

Social stigma in the context of health is the negative association between a person or group of people who share certain characteristics and a specific disease. In an outbreak, this may mean people are labelled, stereotyped, discriminated against, treated separately, and/or experience loss of status because of a perceived link with a disease.

Such treatment can negatively affect those with the disease, as well as their caregivers, family, friends and communities. People who don't have the disease but share other characteristics with this group may also suffer from stigma. The current COVID-19 outbreak has provoked social stigma and discriminatory behaviors against people of certain ethnic backgrounds as well as anyone perceived to have been in contact with the virus.

WHY IS COVID-19 CAUSING SO MUCH STIGMA?

The level of stigma associated with COVID-19 is based on three main factors: 1) it is a disease that's new and for which there are still many unknowns; 2) we are often afraid of the unknown; and 3) it is easy to associate that fear with 'others'.

It is understandable that there is confusion, anxiety, and fear among the public. Unfortunately, these factors are also fueling harmful stereotypes.

WHAT IS THE IMPACT?

Stigma can undermine social cohesion and prompt possible social isolation of groups, which might contribute to a situation where the virus is more, not less, likely to spread. This can result in more severe health problems and difficulties controlling a disease outbreak.

Stigma can:

- Drive people to hide the illness to avoid discrimination
- Prevent people from seeking health care immediately
- Discourage them from adopting healthy behaviors

HOW TO ADDRESS SOCIAL STIGMA

Evidence clearly shows that stigma and fear around communicable diseases hamper the response. What works is building trust in reliable health services and advice, showing empathy with those affected, understanding the disease itself, and adopting effective, practical measures so people can help keep themselves and their loved ones safe.

How we communicate about COVID-19 is critical in supporting people to take effective action to help combat the disease and to avoid fueling fear and stigma. An environment needs to be created in which the disease and its impact can be discussed and addressed openly, honestly and effectively.

Here are some tips on how to address and avoid compounding, social stigma:

1. Words matter. dos and don'ts when talking about the new coronavirus (COVID-19)
2. Do your part. simple ideas to drive stigma away
3. Communication tips and messages.

WORDS MATTER:

When talking about coronavirus disease, certain words (i.e suspect case, isolation...) and language may have a negative meaning for people and fuel stigmatizing attitudes. They can perpetuate existing negative stereotypes or

assumptions, strengthen false associations between the disease and other factors, create widespread fear, or dehumanize those who have the disease.

This can drive people away from getting screened, tested and quarantined. We recommend a 'people first' language that respects and empowers people in all communication channels, including the media. Words used in media are especially important, because these will shape the popular language and communication on the new coronavirus (COVID-19). Negative reporting has the potential to influence how people suspected to have the new coronavirus (COVID-19), patients and their families and affected communities are perceived and treated.

There are many concrete examples of how the use of inclusive language and less stigmatizing terminology can help to in control epidemics and pandemics from the HIV, TB and H1N1 Flu.²

DOS and DON'TS

Below are some dos and don'ts on language when talking about the new coronavirus disease (COVID-19):

DO - talk about the new coronavirus disease (COVID-19)

Don't - attach locations or ethnicity to the disease, this is not a "Wuhan Virus", "Chinese Virus" or "Asian Virus". The official name for the disease was deliberately chosen to avoid stigmatization - the "co" stands for Corona, "vi" for virus and "d" for disease, 19 is because the disease emerged in 2019.

DO - talk about "people who have COVID-19", "people who are being treated for COVID-19", "people who are recovering from COVID-19" or "people who died after contracting COVID19"

Don't - refer to people with the disease as "COVID-19 cases" or "victims"

DO - talk about "people who may have COVID-19" or "people who are presumptive for COVID-19"

Don't - talk about "COVID-19 suspects" or "suspected cases".

DO - talk about people "acquiring" or "contracting" COVID-19

Don't talk about people "transmitting COVID-19" "infecting others" or "spreading the virus" as it implies intentional transmission and assigns blame. Using criminalizing or dehumanizing terminology creates the impression that those with the disease have somehow done something wrong or are less human than the rest of us, feeding stigma, undermining empathy, and potentially fueling wider reluctance to seek treatment or attend screening, testing and quarantine.

DO - speak accurately about the risk from COVID-19, based on scientific data and latest official health advice.

Don't - repeat or share unconfirmed rumors, and avoid using hyperbolic language designed to generate fear like "plague", "apocalypse" etc.

DO - talk positively and emphasize the effectiveness of prevention and treatment measures. For most people this is a disease they can overcome. There are simple steps we can all take to keep ourselves, our loved ones and the most vulnerable safe.

Don't - emphasize or dwell on the negative, or messages of threat. We need to work together to help keep those who are most vulnerable safe.

DO - emphasize the effectiveness of adopting protective measures to prevent acquiring the new coronavirus, as well as early screening, testing and treatment.

DO YOUR PART:

Governments, citizens, media, key influencers and communities have an important role to play in preventing and stopping stigma surrounding people from China and Asia in general. We all need to be intentional and thoughtful when communicating on social media and other communication platforms, showing supportive behaviors around the new coronavirus disease (COVID-19).

Here are some examples and tips on possible actions to counter stigmatizing attitudes:

- **Spreading the facts:** Stigma can be heightened by insufficient knowledge about how the new coronavirus disease (COVID-19) is transmitted and treated, and how to prevent infection. In response, prioritize the collection, consolidation and dissemination of accurate country- and community-specific information about affected areas, individual and group vulnerability to COVID19, treatment options and where to access health care and information. Use simple language and avoid clinical terms. **Social media** is useful for reaching a large number of people with health information at relatively low cost.³
- **Engaging social influencers**⁴ such as religious leaders on prompting reflection about people who are stigmatized and how to support them, or respected celebrities to amplify messages that reduce stigma. The

information should be well targeted and the celebrities who are asked to communicate this information must be personally engaged, and geographically and culturally appropriate to the audiences they seek to influence. An example would be a mayor (or another key influencer) going live on social media and shaking hands with the leader of the Chinese community.

- **Amplify the voices**, stories and images of local people who have experienced the new coronavirus (COVID-19) and have recovered or who have supported a loved one through recovery to emphasize that most people do recover from COVID-19. Also, implementing a “hero” campaign honoring caretakers and healthcare workers who may be stigmatized. Community volunteers also play a great role in reducing stigma in communities.
- **Make sure you portray different ethnic groups.** All materials should show diverse communities being impacted and working together to prevent the spread of COVID-19. Ensure that typeface, symbols and formats are neutral and don’t suggest any particular group.
- **Ethical journalism:** Journalistic reporting which overly focuses on individual behavior and patients’ responsibility for having and “spreading COVID-19” can increase stigma of people who may have the disease. Some media outlets have, for example, focused on speculating on the source of COVID-19, trying to identify “patient zero” in each country. Emphasizing efforts to find a vaccine and treatment can increase fear and give the impression that we are powerless to halt infections now. Instead, promote content around basic infection prevention practices, symptoms of COVID-19 and when to seek health care.
- **Link up:** There are a number of initiatives to address stigma and stereotyping. It is key to link up to these activities to create a movement and a positive environment that shows care and empathy for all.

COMMUNICATION TIPS and MESSAGES

An “infodemic” of misinformation and rumors is spreading more quickly than the current outbreak of the new coronavirus (COVID-19). This contributes to negative effects including stigmatization and discrimination of people from areas affected by the outbreak. We need collective solidarity and clear, actionable information to support communities and people affected by this new outbreak.

Misconceptions, rumors and misinformation are contributing to stigma and discrimination which hamper response efforts.

- **Correct misconceptions** at the same time as acknowledging that people’s feelings and subsequent behavior are very real, even if the underlying assumption is false.
- **Promote the importance of prevention**, lifesaving actions, early screening and treatment.

Collective solidarity and global cooperation are needed to prevent further transmission and alleviate the concerns of communities.

- **Share sympathetic narratives**, or stories that humanize the experiences and struggles of individuals or groups affected by the new coronavirus (COVID-19)
- **Communicate support** and encouragement for those who are on the frontlines of response to this outbreak (health care workers, volunteers, community leaders etc).

Facts, not fear will stop the spread of novel coronavirus (COVID-19)

- Share facts and accurate information about the disease.
- Challenge myths and stereotypes.
- Choose words carefully. The way we communicate can affect the attitudes of others (see do’s and don’ts above).

¹This checklist includes recommendations from Johns Hopkins Center for Communication Programs, READY Network.

²UNAIDS terminology guidelines: from ‘AIDS victim’ to ‘people living with HIV’; from ‘fight against AIDS’ to ‘response to AIDS’.

³ Nigeria successfully contained the 2014 Ebola outbreak that affected three other countries in West Africa partly through employing targeted social media campaigns to disseminate accurate information and correct hoax messages circulating on Twitter and Facebook. The intervention was particularly effective because international non-governmental organizations (NGOs), social media influencers, celebrities and bloggers used their broad platforms to forward and share information and opinions on the health communication shared. Fayoyin, A. 2016. Engaging social media for health communication in Africa: Approaches, results and lessons. *Journal of Mass Communication and Journalism*, 6(315).

⁴ The term “Angelina Jolie effect” was coined by public health communication researchers to account for increased Internet searches about breast cancer genetics and testing for several years after 2013 actress Angelina Jolie underwent a much-reported preventative double mastectomy. The “effect” suggests that celebrity endorsements from trusted sources can be effective at influencing the public to seek health knowledge, their attitudes towards and uptake of healthcare services for Covid-19.

CHR PROGRAM

MEDICATION

DELIVERY

CALL: (928)-715-0278
INFORMATION NEEDED
NAME, SCRIPT #,
DOB OR PATIENT ID #, AND
DELIVERY INSTRUCTIONS

MONDAY - FRIDAY
8:00AM - 5:00PM
LAST REQUEST FOR
DELIVERY IS AT 4:00PM
EXCLUDING HOLIDAYS

Areas: Peach Springs, Buck-N-Doe, Truxton, Valentine,
Hackberry, Kingman

Medications will be delivered no later than 5:30pm daily.

Medication will be delivered "Contactless" to help prevent
the spread of the COVID-19.

All information provided is confidential.

Transportation Staff

Sandra Irwin, Health Dept, Director
Philbert Watahomigie Jr, Transportation
Manager

Kristina Shongo, Transportation
Administrative Assistant
Viola Gala, Transportation Driver
Marie Kisner, Transportation Driver
Sheilah Navarro, Transportation, Driver

Each Staff member is trained in vehicle and passenger safety, which includes use of seat belts, biohazard clean up. Drivers also receive CPR, First Aid, and defensive driving training.

Transportation is provided to individuals who have a medical appointment, locally or out of area. These transports include the local IHS clinic, Kingman, Bullhead City, Las Vegas, Parker, Flagstaff, Tuba City, Prescott, and Phoenix. Funding is provided by the Hualapai Tribe or AHCCCS (if client is eligible).

Other transportation includes travel to Kingman to shop and other personal activities. **These individuals are charged \$10 per person for each 100 miles traveled. Medical transports take precedence over other types of trips. Also, all transports are subject to the availability of drivers.**

Non-Emergency Medical Transportation Rider Rules

Riders have a responsibility to conduct themselves in a manner, which shows consideration for the comfort of other passengers. Toward that end, the NEMT has adopted the following Passenger Rules:

- **Alcohol**—There is to be no alcohol allowed on transport vehicles, nor persons having an odor of alcohol.
- Conduct—Obscene language, loud noises, or boisterous conduct is prohibited.
- Smoking - Smoking or carrying any lighted substance on board an agency vehicle is prohibited.
- Noise - Playing of radios, tape recorders or similar devices (other than by means of an earphone) is prohibited.
- Food - Consumption of food or beverages is prohibited.
- Graffiti - Any writing, spraying, scratching or otherwise affixing of graffiti on, or in, facilities or vehicles is prohibited.
- Seatbelts - Passengers must remain in their seats and wear seat belts at all times.
- Seating - Wheelchairs shall have priority over other persons seated in the wheelchair tie-down locations. Other seats are designated as courtesy seating for elderly and disabled.
- Please be ready for your ride early. Watches and clocks seldom agree, and an error of time may result in a missed transport.

Non-Emergency Medical Transport Program

Hualapai Transportation Local and Out of area

Out of area includes, but not limited to:

Kingman, Bullhead City, Las Vegas, Parker, Flagstaff, Tuba City, Prescott, and Phoenix.

Ba'wa Siv: Jik
"Because We Think of Them"

Hualapai Health Department
488 Hualapai Way P.O Box 397
Peach Springs, AZ 86434
Telephone: 928-769-4188
Fax: 928-769-2881

Hualapai Transportation Services offered for:

- Dialysis Treatment
- Medical Appointments
- Dental Appointments
- Optometry Appointments
- Discharge from Health Facility

Public Transportation offered by a state or local government is covered by Title II of the ADA.

We have vehicles that are accessible to those with disabilities, via ramps and securement devices

Our drivers are courteous and well-trained. Compliments, Complaints, Suggestions, and all feedback are welcome.

Complaints may be made by phone (928-769-4188), or in writing, to the Transportation Manager. The complaint will be documented and investigated in a timely manner

The ADA and Title VI complaint procedure is posted in each Transportation vehicle.

Steps to requesting Hualapai Non-Emergency Medical Transportation

Medical Transports:

- Client notifies IHS Purchase Referred Care Clerk, explains need of medical transportation.
- IHS Clerk will complete transportation forms and fax to the Health Department's Transportation Office
- Transportation Manager schedules the transport and assigns driver.

Non-Medical Transport

- **The request for non-medical transport is completed, and faxed, or brought to the Health Department, with the receipt obtained from the tribal office after paying the fee of \$10.00/100 miles.**

- Transportation Manager schedules the transport and assigns driver.

*** THINGS TO CONSIDER: ***

- **Request transportation 2 days in advance. Requests "on day" of transport may not be honored, due to scheduling.**
- **If you are unable to make the scheduled transport, please notify the Transportation Program as soon as possible.**
- **Dialysis clients and requests for medical transport take top priority.**
- **Medical Facilities need to notify us directly, when clients are discharged.**

Hualapai Non-Emergency Medical Transport Program Description

The Hualapai Health Department's Non-Emergency Medical Transportation (NEMT) Program, provides transport services for dialysis and non-emergency medical purposes.

Medical Transport Trips are requested through the Indian Health Service's Purchase Referred Care office, because they receive the appointment or admission information from the medical providers. The Purchase Referred Care Office personnel schedule the appointment and give the information to the NEMT Program.

The trips are provided between 8 AM and 5 PM, Monday through Friday. Saturdays are reserved for dialysis clients.

Other types of transports are provided for individuals who do not have a vehicle and whose income is limited. **Medical transports take precedence over other types of trips. Also, all transports are subject to availability of drivers.** Those trips may include; food, bank, shopping, pick-up or drop off at various places, trips to medical facilities where an immediate relative has been flown or taken by ambulance.

There are also trips requested and scheduled for individuals, not financially in need, who need to pick up a vehicle, shop for a program, and other social or program issues that may arise. The trips are available (if there is a driver/vehicle) between 8 AM to 5 PM, Monday through Friday.

KWLP 100.9FM's November Volunteers of the Month • John and Sara Hopkins

Submitted by: Terri Hutchens | KWLP 100.9FM

WE LOVE OUR VOLUNTEERS

"The Peach."

*The Hualapai Nation's Live and Local Radio Station
Proudly Announces and Congratulates
November 2020 Volunteers of the Month:*

John and Sara Hopkins

John and Sararese Begay Hopkins are the newest members to the Peach crew of volunteers! Both are Native American. John is a member of the Narragansett Tribe of Rhode Island and Sara is Navajo. John and Sara have resided in Peach Springs for two school years, as Sara is the special education teacher at the Peach Springs Elementary School. John and Sara have jumped into "The Peach" with both feet - participating with staff in the Halloween parade (lots of fun!) and hosting shows. You can hear John, aka Huckleberry Hopkins every Wednesday afternoon hosting O.K. Corral. Sara "Athabascan" Hopkins shares interesting Native news and history Sunday mornings on Native Circle. She also now sits in the Education spot of the station's advisory committee. Both have previous experience in radio. We are lucky to have them aboard! Tune in, let them know you're listening and please give them a nice Hualapai welcome! They will receive incentives valued at over \$100.00 for being Volunteers of the Month and be eligible to be Volunteer of the Year!

If you'd like to join the Peach volunteers: Call 769-1110. KWLP Volunteers sponsored in part this month by:

KWLP 100.9FM's December Volunteer of the Month • Willow Majenty AKA DJ Pillow
Submitted by: Terri Hutchens | KWLP 100.9FM

WE LOVE
OUR VOLUNTEERS

"The Peach."

*The Hualapai Nation's Live and Local Radio Station
Proudly Announces and Congratulates
December 2020 Volunteer of the Month:
Willow Majenty aka "DJ Pillow"*

While The Peach ordinarily doesn't award a Volunteer of the month in December, (we move right on the Volunteer of the Year.) staff decided it was warranted THIS unprecedented year. We consider this to be an honorable mention of sorts, or perhaps something like a lifetime achievement award. Willow Majenty, Peach Springs community and Hualapai Tribal member joined the KWLP volunteer DJ crew in 2017. She has always been an enthusiastic and reliable participant at the station - hosting her show "Rock Out Hour" and assisting with events and more! It has been our pleasure to watch her blossom! During the pandemic, she has made a point to come in whenever possible to pre-record her shows for the times of stay at home and lock down orders. Unfortunately, her Tuesday show has often been pre-empted by the COVID-related, live special Council meetings. We want to be sure she knows that we really appreciate her effort and dedication! If you get a chance, please let her know you do too! Willow will receive \$100 in incentives as Volunteer of the Month!

*If you'd like to join the Peach volunteers, Call 769-1110
