ADDENDUM NO. 1

Modification to Scope of Work

1. **Alternate path for Wecom’s fiber optic line right-of-way.** Wecom approached the tribe on July 1st saying they are investigating an alternate path for the fiber optic line right-of-way in Valentine and on a portion of the Hualapai Reservation west of Peach Springs (see attached maps). The proposed rights-of-way would be within the existing State Route 66 right-of-way for a distance of some 8.5 miles. This would entail Wecom obtaining a permit with ADOT to excavate a trench along the shoulder of the highway to place the new buried fiber optic cable. The fiber optic cable would emerge west of downtown Peach Springs and be placed on the existing Mohave Electric Cooperative power poles as an under-build as described in the RFP.

   The tribe seeks to know the value of the alternative right-of-way and if there is a difference in value between the original aerial fiber optic cable right-of-way and the alternative which buries part of the fiber optic cable.

2. **Additional time to prepare proposals.** Given this modification to the scope, the new proposal due date is now Thursday, July 14, 2022, at 2:00 PM.

Should you have any questions regarding this Addendum, please contact me at (928) 769-1310.

Except as modified herein all other specifications, terms, conditions and special provisions shall remain the same.
