

Southwest Area Incident Management Team

TEAM 3 – LANCE ELMORE – INCIDENT COMMANDER

Hualapai Tribal Forestry and Wildland Fire Management: 928-769-2312

Fire Management Transition and Minimal Fire Activity Daily Update July 29, 2022

Acres: 1378 acres

Location: 25 Miles North of Peach Springs

Containment: 72%

Personnel: 138

Start Date: Thursday, July 21, 2022

Cause: Under Investigation

Fuels: Timber, Brush, and Short Grass

Due to the reduced need for resources, Southwest Area Incident Management Team 3 will transition management of the C3 fire back to the host unit on Saturday, July 30th at 6:00 a.m. This will be the final update provided by the Incident Management Team, visit <https://hualapai-nsn.gov/> for future information. The team would like to extend its sincerest thank you to the Hualapai Tribe for the continual support and assistance.

The C3 Fire area has received over four inches of rain the past few days, which has reduced the fire's behavior and growth. The fire is smoldering, consuming larger logs and roots. Given the significant amount of moisture received, firefighters do not anticipate the fire growing outside of its existing footprint.

For safety and protection, the public is encouraged to stay out of the area for their safety and for the safety emergency responders. The public is also encouraged to monitor weather conditions and beware of potential flash flooding in the area.

Weather: Monsoon moisture will remain across the region through the week. This will bring chances for thunderstorms with an increased potential for flash flooding and gusty winds with passing storms; daytime temperatures in the mid-70s.

Fire Restrictions: All fire restrictions will be lifted as of 6:00 a.m. this morning on the Hualapai Indian Reservations.
